Oxford snow plowing

Oxford roads after plowing March 22, 2024

This slide show is meant to share a visual representation of the conditions of living on the various roads in Oxford township.

It is our hope that these images of our paved vs gravel roads after plowing will contribute to the sustained awareness and understanding of some of the differences between living on gravel vs paved roads.

We will continue to document road conditions throughout the year and post images on the website and Facebook for visibility to all.

Baylor at around 1 pm on March 22
heading north from 245th

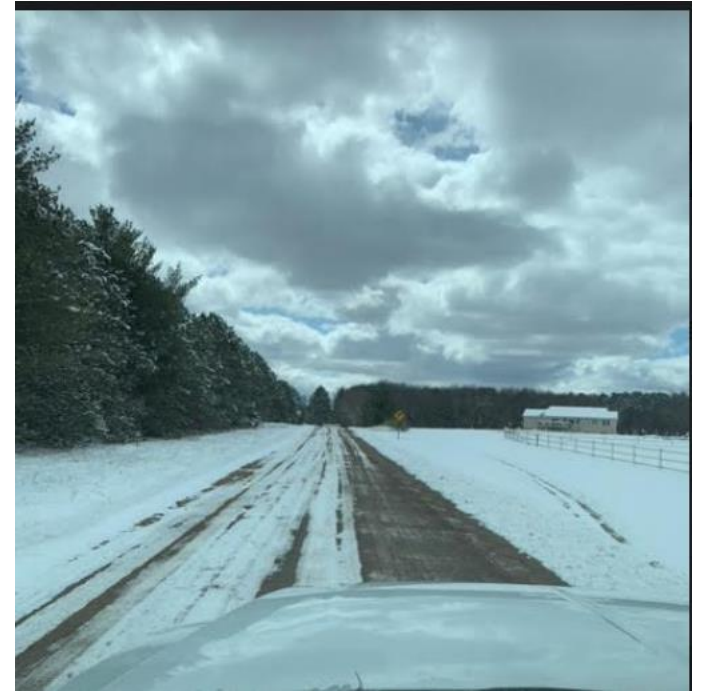

254 heading east from Thames heading to Baylor

Typo Creek Drive heading South from CR20

259th heading west towards Potomac

Please note the gravel in the ditch despite our snowplow operator raising the blade to try and minimize scraping off gravel with the snow.

Also note, **this is not a criticism of the snowplow operator.** The gravel loss is a function of the weather/road conditions.

Corner of 261 Street and Limpopo

Please note the gravel in the ditch despite our snowplow operator raising the blade to try and minimize scraping off gravel with the snow.

Also note, **this is not a criticism of the snowplow operator.** The gravel loss is a function of the weather/road conditions.

Potomac heading south
